

Curriculum Vitae et Studiorum

of Walter Ambrosini

General Data

First Name: Walter

Family Name: Ambrosini

Place and Date of Birth: Pistoia (I), May 6th, 1958

Family: Married with Rosaria Vatteroni, Secondary School Teacher of Mathematics and Physics;
two daughters: Ilaria (born on April 17th, 1991) and Margherita (born on June 30th, 1993)

Home Address: Via G. Toniolo, 13 - 54031 AVENZA (MS) - Tel. ++39-0585-858584

Mobile Phone: ++39-349-5733025, E-mail: rosywalt@virgilio.it

Military Service: Performed from January 2nd 1986 to January 1st 1987 in the Italian Air Force

Present Working Position

Qualification: Associate Professor (Professore Associato) at the University of Pisa

Faculty: Facoltà di Ingegneria (Faculty of Engineering)

Department: Dipartimento di Ingegneria Meccanica, Nucleare e della Produzione (DIMNP)

Address: Università degli Studi di Pisa,

Facoltà di Ingegneria,

Dipartimento di Ingegneria Meccanica, Nucleare e della Produzione

Via Diotisalvi, 2

I-56126 PISA

Tel. ++39-050-836673, Fax. ++39-050-836665

E-Mail: walter.ambrosini@ing.unipi.it

Web page: <http://docenti.ing.unipi.it/~d8155/>

Studies and Academic Career

- Classical Lyceum in Carrara (I). Leaving examination in 1977 (60/60, i.e., full marks).
- Degree in Nuclear Engineering at the University of Pisa (I) in April 1985 (110/110 'cum laude', i.e., full marks) with a thesis on the relevance of heat conduction during DBAs in LWRs.
- Research Doctorate course at the University of Pisa (Safety of Nuclear Plants) from 1985 to 1988.
- Research Doctor since 1989 with a thesis on the constitutive laws of RELAP5 and CATHARE codes.
- Consultant for University of Pisa through THEMAS s.r.l. from November 1988 to November 1992.
- Researcher (Assistant Professor) in Nuclear Plants at the University of Pisa from November 16th, 1992.
- Confirmation as a Researcher in November 1995.
- Associate Professor in Nuclear Plants from November 2001.

Research Activity

Walter Ambrosini performed research activities in the field of *Nuclear Reactor Safety* since his degree in Nuclear Engineering in 1985. In the following, a summary of the main achievements is reported.

1. Application and validation of codes for safety analysis of nuclear reactors

- studies related to the validation of the CATHARE code
- contribution to the application of the RELAP5 code for the analysis of innovative reactors
- contribution to the evaluation of the accuracy in thermal-hydraulic code calculations;
- application of the RELAP5 code to the thermal-hydraulic benchmarks proposed in the frame of the STORM Project;
- cooperation in the design of experimental tests envisaged in the frame of the Boiling Instability Program (BIP)
- tutorship and contribution to the application of the RELAP5 code to instabilities actually occurred in real plants
- application of RELAP5 to natural circulation experiments performed in the CHEOPE facility, operating with Lead Bismuth Eutectic (for ADS applications);
- application of RELAP5 to natural circulation and gas-injection enhanced cireculation experiments performed in a water loop (for ADS applications);

2. Development of models for basic thermal-hydraulic phenomena and plant transients

2.1. Development and application of numerical methods for heat transfer and fluid-dynamic problems

- development of analytical methods for analysing transient conduction in 1D (plane and cylindrical) structures;
- development of a coarse-mesh method for heat conduction in 1D (plane, cylindrical and spherical) structures;
- proposal of an algorithm based on the characteristic form of balance equations for the analysis of 1D flow transients;
- involvement in Computational Fluid-Dynamic (CFD) analyses, of simultaneous heat and mass transfer problems;

2.2. Proposal and application of mechanistic correlations for basic phenomena

- cooperation in setting up a correlation for predicting CCFL at the upper tie plate of fuel elements in nuclear reactors;
- proposal of correlations for film thickness, interfacial shear and drop size in annular flow;
- studies in relation to condensation in the presence of noncondensable gases developed in the frame of contracts with ENEL since 1992 and with the support of the European Community through the INCON Project;

2.3. Development of codes for the analysis of plant transients

- contribution to the development of the FASTRAP code, for fast-running analyses of PWR behaviour;
- development of computer programs in the frame of contracts with ENEL:
 - development of an engineering model for the primary system of AP600 and SBWR to be used in the Integrated FUMO code for containment analysis;
 - development of the ICONA program for the analysis of the behaviour of PCCS in SBWR;
 - development of the thermal-hydraulic module of the ECART code, the ENEL-EdF code for analyses of aerosol transport during severe accidents.

2.4. Models for instabilities in single-phase loops and boiling channels

- cooperation in writing a State-of-the-Art Report on BWR Stability problems, promoted by OECD-CSNI: in particular, W.A. has been co-author with Prof. D'Auria of Chapter 4 of the Report, related to modelling techniques and codes for predicting stability characteristics of BWRs, and actually wrote in person most of it;
- study of chaotic instabilities in single-phase thermosyphon loops in the frame of an ongoing informal cooperation with the Autoridad Regulatoria Nuclear (ARN) of Argentina (Ing. Juan Carlos Ferreri);
- analysis of boiling channels with a methodology similar to the one developed for single-phase thermosyphon loops;
- analysis of heated channels with supercritical fluids and proposal of novel dimensionless parameters suitable for setting up stability maps.

3. Experimental activities

- Experimental studies on falling film evaporation (DABASCO Project, 4th Framework Programme);
- Statistical characterisation of falling films
- Experiments on natural circulation and gas-injection enhanced circulation for ADS applications in a water loop
- Experiments on steam condensation in the presence of noncondensable gases

Teaching Activity

W.A. started his teaching activity in 1992, supporting the Courses for the Degree in Nuclear Engineering and, in particular, the Courses of *Thermal-Hydraulics* and *Numerical Methods for Nuclear Reactors*. In particular:

- since the Academic Year 1993-1994, W.A. is lecturing in the Course of *Thermal-hydraulics* (Official Teacher: Prof. F. D'Auria), with cycles of lectures on single-phase fluid mechanics and exercises on two-phase flow subjects;
- in the Academic Year 1997-1998, W.A. performed a cycle of lectures in the frame of the course of *Numerical Methods for Nuclear Reactors* (Official Teacher: Prof. B. Montagnini);
- since the Year 1998-1999, W.A. is the Official Teacher of the Course of *Numerical Methods for Nuclear Reactors*; the program of this one-semester Course is entirely devoted to numerical methods for Reactor Physics, i.e., neutron diffusion and neutron transport;
- since the Year 2001-2003 he teaches the Module of *Thermal-hydraulics* in the joint course of *Thermodynamic and Thermal-hydraulics* at the 2nd year of the Laurea in Sicurezza Industriale e Nucleare;
- since the Year 2004-2005 he teaches the Course of *Numerical Simulation of Energy Systems*;
- W.A. is performing tutorship for students of different Courses for the Degree in Engineering of Industrial Safety (BS Level) , which are given support both during the study of the matters and in developing preparatory works required for the examinations;
- W.A. has been Tutor of several degree theses in Nuclear Engineering, dealing with both Thermal-hydraulics and Reactor Physics;
- W.A. has been Tutor of several 'Semesterarbeit' theses of German students coming from Lehrstuhl A fuer Thermodynamik of the Technische Universitaet Muenchen (TUM) in the frame of the SOCRATES-ERASMUS Project; he is also informally in charge of the organisation of the stages of the ERASMUS students coming to DIMNP;
- W.A. has been Vice-President of the Teaching Board of the Research Doctorate in Nuclear and Industrial Safety (SNI) at the University of Pisa;
- From November 1st 2008 he is President of the Teaching Board of the Research Doctorate in Nuclear and Industrial Safety (SNI) at the University of Pisa.

Refereeing Activity

- W.A. has been in different cases Referee of papers submitted to Conferences and International Journals in the fields of Nuclear Engineering, Heat Transfer and Two-Phase Flow.
- W.A. is Subject Editor for Heat and Mass Transfer for the *Latin American Applied Research Journal*.
- He is currently involved in the evaluation of research projects for the European Union and International Scientific Bodies for aspects related to fundamental and nuclear reactor thermal-hydraulics as well as education in the nuclear field.

Other Professional Achievements

W.A. has been officially licensed to act in Italy as a Professional Engineer by passing the related State Examination in April 1985.

He has been also licensed to teach in Italian Secondary Schools the matters of *Physics* and *Physics, Nuclear Plants and Related Technologies*, by passing specific licensing competitive examinations. In the case of the competitive examination for Physics, he also won the Chair as a teacher in secondary school.

W.A. also applied to public competitive examinations at ENEA and ENEL for Nuclear Engineers, reporting very good qualifications (1st place ex-aequo at ENEA, G.U. of October 15th 1985 - F.I. n. 243; 6th place at ENEL 4/DG/86).

Contracts and Funding Management

Both as a free professional and as a member of University, W.A. has been directly involved or responsible in contracts with government and industrial partners (ENEA, ENEL, EU, etc.).

He has been part of the Scientific Commission No. 09 for distributing ministry funding within the Faculty of Engineering in the years 1998-2000.

He has been and is responsible of contracts with different external bodies (CESI – Ing. Flavio Parozzi; TEA Sistemi – Prof. Paolo Andreussi) for support in researches related to the development of models for thermal-hydraulic phenomena.

Though not responsible, he has been de facto involved in contracts with the European Commission (DABASCO, INCON; SCACEX).

Walter Ambrosini is responsible for the Italian side of a Mobility Contract granted in the frame of the Indo-Italian Program of Cooperation in Science & Technology 2005–2007, MST-10, Thermal Hydraulic Model Development and Validation for Natural Circulation Systems, whose Indian responsible is Mr. D. Saha of the Bhabha Atomic Research Centre (BARC) of Mumbai (Bombay).

He is also responsible for the Italian side of a Mobility Contract granted in the frame of the Executive Protocol of the 12th Joint Commission on S&T Cooperation between the People's Republic of China and the Italian Republic for the Years 2006-2009; the responsible for the Chinese side is Prof. Pei-xue Jiang from the Tsinghua University in Beijing. The program of research is related to "Experimental and computational analyses in support to the design of innovative nuclear reactor concepts".

He is also responsible for the Inter-University Convention between the University of Pisa and the Shanghai Jiao Tong University (Prof. Xu Cheng).

General List of Publications of Walter Ambrosini

International Journals

- IJ-1. W. Ambrosini, B. Montagnini, F. Oriolo "**A one-dimensional coarse-mesh method for conduction in heat structures**" *International Journal of Heat and Technology*, Vol. 6 - No. 1-2 1988

Theses

- T-1. **Tesi di Laurea in Ingegneria Nucleare**, discussa il 12 Aprile 1985 presso l'Universita' di Pisa (Anno Accademico 1983/84), dal titolo : "Problemi di simulazione dello scambio di calore per conduzione nelle strutture degli impianti nucleari ad acqua leggera, in caso di incidente"
- T-2. **Tesi di Dottorato di Ricerca in "Ingegneria Nucleare (Sicurezza degli Impianti Nucleari)"**, discussa il 2 Ottobre 1989 presso la Commissione Giudicatrice Nazionale 089-Nucleare e depositata presso le Biblioteche Nazionali di Firenze e Roma, dal titolo : "Analisi dei codici termoidraulici di sistema RELAP5/MOD2 e CATHARE V1.3 con particolare riferimento al modello idrodinamico di base"
